

12v inverter is always on

Overview

Should you leave an inverter on?

As long as the inverter has access to power, anything connected to it will keep running. For many this is the most important benefit of leaving an inverter on. If your home is off the grid, the inverter almost always has to be left on.

Should I Turn Off my inverter if I have another power source?

Anytime you have another power source available – direct AC, generator, shore power etc. – you have the option to turn off the inverter. The benefit of leaving it on however, is the system automatically switches to it when the other power source is no longer available. In the end it is your call.

What happens if the inverter goes out?

The power goes out and your appliances cease to run. You can always turn the inverter back on but that can take time. And most appliances do not like being turned on and off. By leaving the inverter on, the system can automatically switch to it when shore power ceases.

What if my inverter runs only on battery power?

If your inverter runs solely on battery power, you will have to turn it off at some point. Specifically when the battery has to be replaced or recharged. If you completely discharged the battery bank, the inverter cannot run. Turn off the inverter and recharge the battery. When it is full, turn the system on again.
