

15MWh Solar-Powered Container Used for Tourist Attractions in the Dominican Republic

Overview

Why does the Dominican Republic need solar power?

The Dominican Republic's energy supply is largely dependent on crude oil imports at present. The rising import price of this limited energy source is leading to increased interest in solar power. In addition, the island state is suffering from a continuous shortage of electricity, which makes the expansion of generation capacities imperative.

Are there solar power stations in the Dominican Republic?

Photovoltaic Power Stations (current and possibles - in study) in Dominican Republic. Own elaboration. The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy.

How many solar projects are there in the Dominican Republic?

The solar energy projects in the Dominican Republic began operating in 2016. Currently, there are 11 definitive concessions for the generation of PV electrical energy. These projects cover an installed capacity between 3 MW and 58 MW (see Fig. 5.). Next, a brief inventory first of its kind in the country.

How can solar power be used in Santo Domingo Este?

Towards this goal is the construction of a 11.44 MWp solar PV plant in Santo Domingo Este. The project involves setting up a 5.3 km transmission line to connect the solar plant to the Maranatha 69 kV substation and a 500m² solar hybrid greenhouse to demonstrate solar power's role in sustainable agriculture. The project is a collective effort.
