

295w high efficiency perc bifacial module

Overview

Product Description The DM295-310-M159-60UB PERC MONO CRYSTALLINE MODULE from DMEGC is a high-quality solar panel that boasts superior efficiency and performance. What is PERC bifacial technology?

PERC bifacial technology is a new way to achieve high-power and low-cost module. NSP BiFi double-glass module has high power output and better reliability. Champion module power 298W with 60 cells and equivalent power 337W. NSP BiFi module enables higher system IRR than conventional monofacial multi c-Si, mono c-Si, and PERC modules.

What is bifacial PV & PERC?

BiFi module has various applications in solar farm, agriculture, flat rooftop, BIPV, carport, landmark, snow region, and desert region. Cost reduction is the key to expand bifacial PV market. PERC bifacial technology is a new way to achieve high-power and low-

What is a bifacial solar module?

LONGi launched its mono-PERC modules in 2016, featuring integrated PERC technology on monocrystalline silicon and low light degradation, and its cell efficiency has increased from 21% to 24.06%. Bifacial modules collect solar energy from both the front and back side of the module, increasing the total power output per module.

What is NSP BiFi 295W module?

NSP BiFi 295W module enables higher system IRR than conventional monofacial 265W multi c-Si, 280W mono c-Si, and 295W PERC modules. Higher albedo enables higher IRR in BiFi system. BiFi module has various applications in solar farm, agriculture, flat rooftop, BIPV, carport, landmark, snow region, and desert region.
