

30kw inverter AC output maximum current

Overview

What is the maximum input voltage for a 40kW inverter?

The inverter has a maximum input current, such as 40A for 40kW. Only when the input voltage exceeds 550V, the output is likely to reach 40kW. When the input voltage exceeds 800V, the heat generated by the loss increases sharply, causing the inverter to derate the output.

What is the maximum output power for a 3 phase inverter?

The supported maximum output power is 16KW/20KVA. Three units work together to support three-phase equipment, one inverter per phase. The supported maximum output power is 12KW/15KVA. NOTE: If this unit is bundled with share current cable and parallel cable, this inverter is default supported parallel operation.
