

# **A green solar container communication station is installed on the balcony**

## Overview

---

What is a balcony power station?

Balcony power stations are the ideal solution for anyone who does not have their own roof or garden, but does have a balcony or terrace, as they can be easily hung over the railing. A balcony power station basically works like a large solar power system by converting sunlight into electricity.

Is balcony solar off-grid?

If you want to brag about your new “Balcony Solar” install, it’s true that any device connected to the power station is “off-grid”. If you have a monitoring system, you can track your power generation, and leverage peak charging times with extra sun exposure. Most importantly, enjoy the empowering feeling of making your own power!.

Can solar power be installed on a balcony?

A smart solution is now permitted - the balcony PV system. Since the end of 2018, the photovoltaic system for balconies has been explicitly permitted according to the installation standard VDE 0100-551-1. This means that even tenants who do not have their own roofs can easily access eco-friendly solar power from their balcony or terrace.

What is a balcony solar energy storage system?

A typical balcony solar energy storage system includes several essential parts:  
Solar Panels: Usually compact and designed to fit balcony spaces, these panels capture sunlight and convert it into electricity.  
Battery Storage Unit: Stores excess energy generated during the day for use at night or during power outages.
