

Albania offshore wind power and energy storage project

Overview

Is Albania working on an offshore wind project?

Albania is working on an offshore wind project supported by the European Bank for Reconstruction and Development (EBRD), according to Minister of Infrastructure and Energy Belinda Balluku. The project is currently in a study phase, she said.

How can Albania improve its energy infrastructure?

2. Creation of a smart energy infrastructure: Supporting solar and wind energy source projects to diversify the renewable energy portfolio, harnessing Albania's ample sunlight and wind resources for clean power generation.

How many solar projects are there in Albania?

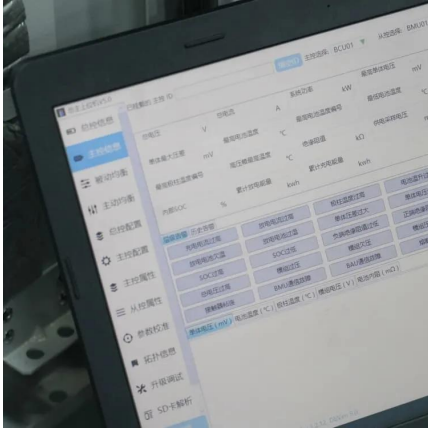

So far, the solar auctions have produced two PV projects with a total of 240 MW. Albania reports 7 GW of wind and solar potential and is looking into developing offshore wind in the Adriatic Sea. The availability of renewable energy resources in Albania for some renewable energy technologies is less studied than for others.

Does Albania have a wind power plant?

Albania currently has no installed wind power plants. However, according to the MIE, since the introduction of the wind FiT support scheme, 70 applications for the construction of wind plants up to 3 MW have been received. Of these, three have been authorised for construction with a total capacity of 9 MW which qualify for FiT support (MIE, 2019).
