

Alternative Solution for 20-foot Photovoltaic Containers

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

What are containerized mobile foldable solar panels?

Containerized mobile foldable solar panels are an innovative solar power generation solution that combines the mobility of containers with the portability of foldable solar panels, providing flexible and efficient power support for a variety of application scenarios.

What is a photovoltaic container?

This device is usually composed of a standard-sized container equipped with photovoltaic modules, photovoltaic inverters, photovoltaic controllers and batteries. The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce volume and weight for easy transportation and storage.

What is the self-sustainable containerised solar PV solution by STATCON Energiaa?

The brand new self-sustainable Containerized Solar PV Solution by Statcon Energiaa provides a ready-made alternative for the common problem of power supply to remote and far-flung areas. The containerised hybrid Solar PV solution can generate around 10,000 kWh/year.
