

Amsterdam Energy Storage Container Two-Way Charging

Overview

Will Amsterdam Energy Arena BV use its own energy?

“Thanks to this energy storage system, the stadium will be able to use its own sustainable energy more intelligently and, as Amsterdam Energy Arena BV, it can trade in the batteries’ available storage capacity.” says Henk van Raan, director of innovation at the Johan Cruijff Arena.

Why is energy storage important in Johan Cruijff Arena?

The energy storage system plays an important role in balancing supply and demand of energy in the Johan Cruijff Arena. The storage system has a total capacity of 3 megawatt, enough to power several thousand households.

How will the energy storage system work?

The energy storage system will provide back-up power, reducing the use of diesel generators, and provide relief to the energy grid by flattening the peaks that occur during concerts. Johan Cruijff Arena is an important player in the top league of international, multi-purpose stadiums.

Amsterdam Energy Storage Container Two-Way Charging

[Shell opens its first megawatt charger in Amsterdam](#)

International energy company Shell today announced the opening of its first megawatt charger facility at the Energy Transition Campus Amsterdam (ECTA) which it says ...
