

Andorra double glass module manufacturer

Overview

What is the difference between a glass/glass module and a standard module?

Compared with standard modules, the same glass material resistance and heat dispersal is more durable in fluctuating temperatures and hot climate zones, ensuring a 50 year lifespan. Unlike other Glass/Glass modules on the market, ViaSolis uses innovative edge-sealant technology to protect PV cells from humidity.

What is a double glass module?

Double glass module: the front and back two pieces of glass + photovoltaic cells are compounded by encapsulation film. Traditional double glass module package: EVA+EVA, EVA+POE, POE+POE. Jiaxing Fuying double glass module package: PVB+PVB.

What is a glass/glass Polly/monocrystalline module?

Glass/Glass polly/monocrystalline modules with unique Glass/Glass design and thermo-sealing protection at all perimeter of the module ensuring superior robust protection against UV, humidity, ammonia and salt corrosion. Safety laminating is ensured by PVB foil.

How much load can a glass/glass module handle?

TÜV tests show that Sonnenstromfabrik Glass/Glass modules can handle loads up to 8.100 Pa. Different to glass/foil modules, Glass/Glass modules are resistant to damages resulting from ammonia in agricultural and industrial installations as well as resistant to damages from salt spray in coastal regions or sand abrasion in desert regions.
