Lead-acid batteries are cost-effective and reliable, while lithium-ion batteries offer a longer lifespan and higher efficiency. Choosing the right battery type depends on your power needs and budget. 3. Preparing for the Connection.

Do inverters and batteries need to match?

The inverter and batteries must match in terms of voltage, capacity, and power output. If you are using a 12V battery, then the input voltage of the inverter must match the battery voltage. If the specifications of the battery and the inverter do not match, the system will not operate stably and may even damage the equipment.
