

BESS solar container outdoor power Company in Rome

Overview

Are battery energy storage systems needed in Italy?

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having an average capacity of less than 20 kWh.

What is Bess & how does it work?

This pioneering spirit evolved with the advent of new renewables, such as solar and wind, which are not, however, programmable. Technological advances aim to make even this energy available at all times through BESS (Battery Energy Storage Systems), which store it for release when necessary.

When will a Bess plant be built in Italy?

Between April and June 2023, we started the construction of new BESS plants in several Italian regions, with a total capacity of 1.6 GW expected by the end of 2024. Many of these plants are located on the sites of old thermal power plants, and this is a virtuous example of the circular economy. Nor does innovation stop here.

Is MACSE a business case for grid-scale storage in Italy?

The CM and a new energy storage-only auction scheme called MACSE are set to form the bedrock of the business case for grid-scale storage in Italy, something that consultancy Timera Energy's director for power market services Steven Coppack said made it unique in Europe (Premium access).
