

Bandar Seri Begawan Supercapacitor Bank Manufacturer

Overview

What is a capacitor bank?

A capacitor bank connects multiple capacitors together to store and release electrical energy. This is to enhance power quality and efficiency in electrical systems. It achieves this by providing power factor correction and reactive power compensation.

Why do you need a capacitor bank installation service?

We also offer capacitor bank installation services to help your electrical system's efficiency through power factor correction. By optimizing your power factor, you can not only reduce energy wastage but also avoid incurring power factor penalties from TNB. Feel free to consult with us to explore how we can best assist you in achieving these goals.

Which capacitor banks are best for power factor correction?

Backed by the Sijil Guna Pakai (Fit for Use Certificate) from TNB Distribution, these capacitor banks offer proven performance and reliability, making them the ideal choice for power factor correction in modern electrical systems.

Who makes optimal power capacitors?

CDE, founded in Liberty, SC in 1909 is a manufacturer of optimal power capacitors. The company's product portfolio includes electrolytic capacitors, mica capacitors, AC film capacitors, DC film capacitors and Power Factor Correction Capacitors.
