

# **Battery energy storage project capacity**

## Overview

---

How many GW of battery storage capacity are there in the world?

Strong growth occurred for utility-scale battery projects, behind-the-meter batteries, mini-grids and solar home systems for electricity access, adding a total of 42 GW of battery storage capacity globally.

Will battery storage set a record in 2025?

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity.

How many GW of solar & battery storage will be added in 2024?

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year.

What is the battery energy storage roadmap?

This Battery Energy Storage Roadmap revises the gaps to reflect evolving technological, regulatory, market, and societal considerations that introduce new or expanded challenges that must be addressed to accelerate deployment of safe, reliable, affordable, and clean energy storage to meet capacity targets by 2030.

## Battery energy storage project capacity

### [Biggest projects in the energy storage industry in 2024](#)

Dec 25, 2024 · Biggest lithium-ion BESS commissioned: Edwards & Sanborn solar-plus-storage project in California The full completion and commercial operation of the Edwards & Sanborn ...

### [New global battery energy storage systems capacity doubles ...](#)

Apr 25, 2024 · Global battery energy storage systems, or BESS, rose 40 GW in 2023, nearly doubling the total increase in capacity observed in the previous year, according to a special ...

### [Executive summary - Batteries and Secure Energy Transitions ...](#)

3 days ago · Battery storage in the power sector was the fastest growing energy technology in 2023 that was commercially available, with deployment more than doubling year-on-year. ...

### [The major Battery Storage projects from around the world](#)

6 days ago · We provide a detailed report on all the major Battery Storage construction projects around the world with key focus on the largest projects in Europe, Africa, USA and Asia

### [Top 5: Largest BESS Projects in the World in 2025](#)

Apr 13, 2025 · The second phase of the project was operationalized a year ago which brought its total energy storage capacity of the project to 530 MW / 2120 MWh, bringing it among the 5 ...

### [China switches on its largest standalone battery storage project](#)

Jul 21, 2025 · This project is the largest hybrid energy storage installation in China and hosts the world's largest grid-forming vanadium redox flow battery, set to reach a 250 MWh/1 GWh ...

### [Solar, battery storage to lead new U.S. generating capacity ...](#)

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...
