

Boston Backup Uninterruptible Power Supply

Overview

What is an uninterruptable power supply (UPS)?

What is a UPS?

An uninterruptable power supply (UPS) is a type of backup battery that will continue to provide electrical power to the electronics that you have plugged into it even if electricity from your home outlets cuts out. Unlike a backup generator, it does not need to power up in order to start generating power.

What is a good ups with a built-in backup battery?

A UPS with built-in backup batteries is essential for protecting your devices from power outages, surges, and other electrical disturbances. Whether you opt for the high-capacity APC Back-UPS Pro 1500VA or the compact and budget-friendly Vertiv Liebert PST5, each UPS on this list offers reliable protection and peace of mind.

Does uninterruptible power supply USP provide surge protection?

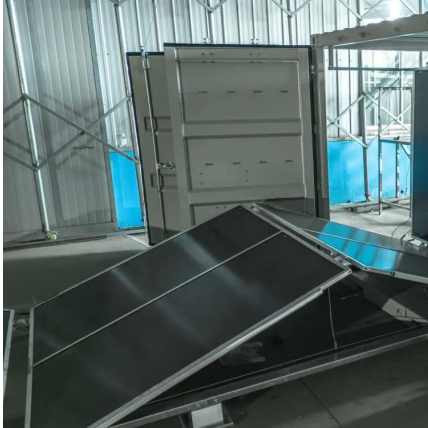

Many models of uninterruptible power supply USP also provide surge protection. A surge protector blocks spikes in voltage so that they do not harm your electronics. So, your battery backup is always at work, protecting your desktop computer, network equipment, or other electronic equipment and charging its battery when not in use.

Which APC UPS battery backup surge protector is right for You?

For those seeking a budget-friendly option, the APC UPS Battery Backup Surge Protector BE425M offers fantastic value without compromising on essential features. With a 425VA/225W capacity, it provides enough power to safely shut down computers and small electronics during outages.
