

# **Can the EPS power supply be equipped with a battery cabinet**

## Overview

---

What is EPs Fire Emergency power supply?

The biggest feature of EPS fire emergency power supply is using the latest IGBT composition power unit DSP full digital control technology, to make the control more accurate, more quick, more reliable and stable, and equipped with special IGBT driving chip and special control circuit.

How much power does an EPS battery supply?

This is a manual action and in a power cut, you must pull this switch before any power is supplied from the batteries. You'll also need to be careful about what you turn on when in EPS mode. The EPS can supply up to 5kw of power (approx. 20A in the UK).

What is emergency power system (EPS)?

What is EPS?

The Emergency Power System (EPS) is the method of using power from your Solar Batteries to provide electricity to either a socket, a group of circuits or your whole house in the event of a power cut. 1) The circuits you need/want to be powered in the event of a power cut.

What happens if an inverter is cut - EPs or no EPs?

1) EPS or no EPS, if there is a power cut, the inverter will shut down completely. This is to protect any power line workers that may be working on them. As you can imagine, without this, the power lines could become energised by solar producing homes and that could be an unwelcome shock to someone who will assume the power is off!

## Can the EPS power supply be equipped with a battery cabinet
