Fast Facts About Canberra Deep Space Communication Complex
The Complex is a NASA facility

managed by CSIRO on behalf of the Australian Government; it operates through a government-to-government, treaty-level agreement. Activities of the Deep Space Network are coordinated by NASA's Jet Propulsion Laboratory in California. The Canberra station was officially opened on 19 March 1965; it was then known as the Tidbinbilla Deep Space Instrumentation Facility. Tidbinbilla was chosen as the location for the Australian facility because it is close to the capital Canberra, and hills shield the site from radio-frequency interference.
