

Canberra bifacial solar panels

Overview

Which bifacial solar panels are best for Canberra Homes?

Our new high-performance 440w Silhouette bifacial solar panels, with a stylish black appearance, are the ideal solution for homes in Canberra thanks to their innovative and premium cell technology. Solahart Silhouette® panels have a positive tolerance ensuring a rated maximum power on or above 440W at standard test conditions.

What are bifacial solar panels?

These dual-sided solar panels harness sunlight from both the front and rear sides, improving efficiency and power generation. In this guide, we'll explore the major benefits of bifacial solar panels in Australia, their applications, and why they're becoming a popular choice for savvy solar adopters.

Do bifacial solar panels generate more energy?

In a bifacial setup, the light that passes through can hit a highly reflective surface, bounce back, and be reabsorbed by the solar cells. By exposing both the front and back sides of the cells to sunlight, bifacial solar panels are able to capture more light and generate more energy overall. [How Much More Energy Can Bifacial Solar Panels Generate?](#)

Are bifacial solar panels better than monofacial panels?

Efficiency: Bifacial solar panels typically have higher efficiency compared to traditional monofacial panels. Their ability to capture sunlight on both the front and back sides can lead to efficiency gains of up to 30% depending on the installation conditions and environment.
