

Canberra solar container communication station wind power settlement requirements

Overview

Do I need a change to the Canberra substation?

As the area to the west of the Canberra Substation is to be developed as part of the Ginninderry development it is recommended that the need for these changes and additions is reviewed in consultation with the Ginninderry developers and the ACT Government to determine the requirements.

Do solar installers need to comply with Australian standards?

Solar professionals must navigate not only national Australian Standards but also a myriad of state-specific regulations, DNSP rules, and SAA guidelines. The distinct rules of each state can make compliance daunting, particularly for installers who operate across multiple jurisdictions.

Does Canberra substation need a new APZ boundary?

With respect to the Canberra Substation the Bushfire Risk Assessment (GFE, 2017) has recommended changes to the existing OAPZ boundary and some additional APZ's in the area.

What is the Australian Capital Territory's electricity reliability criteria?

Background The Australian Capital Territory (ACT) Government's electricity reliability criteria requires electrical providers (such as Transgrid and Evoenergy) to provide a secure electricity supply to the ACT through the provisions of geographically separate and independent and/or contingency electrical supplies.
