

# **Chile s new energy storage power station**

## Overview

---

What is the energy storage capacity in Chile?

As of the first quarter of 2025, the operational energy storage capacity in Chile amounts to 3,660 MWh, Trina Storage noted, quoting data from the country's energy ministry. Trina Storage has shipped the first 1.2-GWh batch of its self-developed Elementa 2 battery energy storage system (BESS) to Chile, it announced on Monday.

How can solar energy and storage improve grid stability in Chile?

Integrating solar energy and storage technologies is crucial for addressing the intermittency and grid stability in Chile. Key projects include Cerro Dominador, solar and PV hybrid, Zelestra's 220 MW solar and 1 GWh battery project, and AES Andes solar and battery storage hub.

How can technology help develop solar and storage projects in Chile?

Several technological innovation can help develop solar and storage projects in Chile. This includes AI, smart grids, and energy storage innovations. Chile generates over 60% of its electricity from renewable sources, with the Atacama Desert hosting some of the world's most powerful solar farms.

Where does Chile get its electricity from?

Chile generates over 60% of its electricity from renewable sources, with the Atacama Desert hosting some of the world's most powerful solar farms. Zelestra, a Spanish renewable company, recently secured a long-term deal for the output of a Chilean energy complex. This will include 220 MWp of solar photovoltaic and 1 GWh of energy storage capacity.
