

Containerized generator installation requirements

Overview

Is permanent installation of containerised generator sets covered by this guideline?

Permanent installation of containerised generator sets are not covered by this guideline. App.A provides a tabularised summary of all requirements, for ease of reference.

What is a containerised generator set?

On a regular basis, containerised generator sets (CGS) are placed on board ships to provide replacement power in case of a damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers. There are currently no clear rules and requirements for such time limited installations.

Why should you choose a containerized generator set?

commercial buildings and government properties require dependable backup power in the event of utility outages to maintain continuity and prevent critical losses. The durable and high-performance Containerized Series generator sets would make the perfect power system for these types of applications.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.
