

Corrosion-resistant folding containers for Saudi ships

Overview

What happens if a container gets corroded?

Without adequate protection, corrosion can begin within hours of exposure to marine environments, mainly when condensation builds up inside containers or when goods are loaded and unloaded in humid port regions. This compromises the integrity of the cargo and can result in costly delays, rejected deliveries, or product failures once in use.

Does anticorrosion packaging prevent rust in sea freight?

Whether shipping machinery, electronics, or steel, investing in protective packaging for metal shipments is the key to rust prevention in Sea freight. Learn how Anticorrosion Packaging ensures cargo protection during maritime shipping.

How does corrosion affect shipping cargo protection?

Corrosion is one of the most significant challenges maritime shipping cargo protection faces. Here are the leading causes: Seawater contains high salt concentrations that accelerate metal corrosion, while temperature variations create drastic condensation that promotes rust growth.

What is a seafold 40 HC container?

SeaFold 40' has the same features as a conventional 40' HC container. Requires no special handling or maintenance equipment. Safe and easy folding and erecting procedure. Compatible with all standard lift equipment found in most ports and terminals. Serviceable by existing maintenance organizations and depots throughout the world.
