

Distributed energy storage vehicle supplier

Overview

What is distributed energy storage?

The company's distributed energy storage solutions combine massive arrays of industrial-strength lithium-ion batteries with specialized software and control systems to enable flexible energy optimization.

What is ABB distributed energy storage?

ABB provides a Distributed Energy Storage (DES) system, a packaged solution for storing energy for later consumption. The two essential components of the system are the DC-charged batteries and the bi-directional inverter. This equipment is enclosed in a shipping-friendly shell that can tolerate harsh conditions.

What are power distribution units & battery distribution units?

Learn about their advanced solutions, features, and benefits for enhanced system efficiency. Power Distribution Units (PDU) and Battery Distribution Units (BDU) are crucial components in energy storage systems and new energy vehicles (NEVs). These units manage, distribute, and protect power efficiently, ensuring system safety and stability.

Which products work with Nev & energy storage systems?

High Compatibility: Products work with a wide range of NEV and energy storage systems, simplifying integration. Bosch, a leader in automotive and industrial technologies, offers PDU and BDU solutions suited for NEVs and energy storage.
