

# **Do I need to turn off the inverter when the UPS battery is disconnected**

## Overview

---

What if my inverter runs only on battery power?

If your inverter runs solely on battery power, you will have to turn it off at some point. Specifically when the battery has to be replaced or recharged. If you completely discharged the battery bank, the inverter cannot run. Turn off the inverter and recharge the battery. When it is full, turn the system on again.

Do RV inverters need to be turned off?

The following applies mostly to RV inverters unless otherwise specified. If your inverter runs solely on battery power, you will have to turn it off at some point. Specifically when the battery has to be replaced or recharged. If you completely discharged the battery bank, the inverter cannot run. Turn off the inverter and recharge the battery.

What happens if the inverter goes out?

The power goes out and your appliances cease to run. You can always turn the inverter back on but that can take time. And most appliances do not like being turned on and off. By leaving the inverter on, the system can automatically switch to it when shore power ceases.

Can I switch off my inverter when my batteries are fully charged?

Well, yes, you can switch off your inverter when your batteries are fully charged and it is not in use. Once the batteries are fully charged the consumption power is less than 1% of their capacity. Hence keeping your inverter ON would not make any difference in your electricity bills.
