

Egypt Vanadium Battery Energy Storage

Overview

Could battery storage be a game-changer for Egypt's energy sector?

The integration of battery storage with solar PV is a game-changer for Egypt's energy sector, providing reliable and dispatchable renewable energy and reducing reliance on fossil fuels. It not only meets Egypt's current energy needs but also sets a precedent for future dispatchable hybrid renewable energy projects in the region.”.

What is Egypt's first hybrid solar and battery project?

The project, billed as Egypt's first hybrid solar and battery project, will be built in two phases. The first will see 561 MW of solar constructed alongside 100 MW/200 MWh of battery storage, with a targeted date for commercial operation in the first half of next year.

How many MW solar & battery storage will be built in 2026?

The project will be constructed in two phases. The first phase of 561 MW solar + 100 MW/200 MWh battery storage is targeted to reach commercial operational date (COD) in the first half of 2026 and the second phase of 564 MW solar in the second half of 2026.
