

# **Emergency Command Energy Storage Container 25kW**

## Overview

---

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

Why should you choose a container energy storage system?

Safety is paramount in our container energy storage systems. Through advanced multilevel safety protocols, we guarantee the security of your energy investments, prioritizing user safety, system integrity, and peace of mind. Prepare for the unexpected with our container energy storage's black start capability.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO<sub>4</sub>) combined with an intelligent 3-level battery management system (BMS);.

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.
