

Energy Storage Product Series

Overview

What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

Which energy storage series products have full-stack coverage?

The energy storage series products of SVOLT achieved full-category coverage, providing a full-stack solution for cells, PACK, systems, and intelligent applications. Advanced staking process is adopted for SVOLT products and all series products have undergone penetration test to ensure safety.

What are the applications of energy storage system?

The energy storage system can achieve applications such as solar energy storage integration, energy transfer, primary frequency regulation, secondary frequency regulation, reactive power support, short-circuit capacity, black start, virtual inertia, damping, etc. in conjunction with photovoltaic power generation.

What is energy storage & how does it work?

In the event of a power outage or sudden malfunction in the power grid, household energy storage can be put into standby mode to ensure basic electricity consumption. Energy replenishment can be achieved during peak electricity consumption to supplement insufficient power supply in the power grid and avoid grid overload and faults.
