

Evacuate the solar inverter

Overview

Should I Turn Off my solar inverter?

Turning off your solar inverter might be necessary for various reasons, including system maintenance, troubleshooting, or during an emergency. Properly shutting down your solar inverter ensures safety and prevents damage to the system. This guide provides a detailed, step-by-step process to safely turn off a typical solar inverter.

How to turn a solar inverter on?

You will see a black circular switch on the inverter. Turn it clockwise to the ON position. Next, you must search for a small red button. Once located, turn it to 1, which means the inverter is ON. Wait for a while. Once all the steps are completed, the inverter will show green or green and blue lights. This is how you can turn the inverter on.

How do you shut down a solar inverter?

Step 3: Turn Off the AC Disconnect The first step in shutting down your solar inverter is to turn off the AC disconnect. This switch is usually located near the inverter and cuts off the alternating current (AC) from the inverter to your home's electrical panel.

- Locate the AC disconnect switch near your inverter.

How do I protect my solar inverter from a power outage?

3. Use surge protectors to protect your solar inverter from power surges caused by lightning or other electrical events.
4. Install a battery backup system to keep your solar system running even during a power outage, which can help avoid the need to turn off the inverter.
