

Financing for a 60kW Solar Storage Container in the Democratic Republic of Congo

Overview

What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available [here](#). The Democratic Republic of Congo's national electricity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million households, only 1.6 million have access to electricity.

Should solar-plus-storage systems be used in developing countries?

"Solar-plus-storage systems can provide clean, affordable, and reliable electricity access in developing countries while reducing dependence on fossil-based energy systems," said World Bank Vice President for Infrastructure Guangzhe Chen.

How will a green mini-grid impact the DRC?

Successful implementation is expected to spur future development of private sector green mini-grids that not only address the country's clean energy targets but also reduce the country's GHG emissions from the energy sector by displacing diesel-based generation across the DRC.

What are the barriers to power supply in DRC?

Key barriers to the provision of appropriate power in DRC include heavy reliance on hydropower generation, of which less than 50% is currently available for generation due to aging infrastructure and lack of maintenance, and the underdeveloped power grid which only covers the southern and the eastern region.
