

# Ford uses cylindrical lithium batteries

## Overview

---

Does Ford make lithium phosphate batteries?

Ford has completed construction on BlueOval Battery Park Michigan in the US, a facility focussed on lithium iron phosphate (LFP) battery cells. The company says this is the first time an American company will manufacture LFP cells and pack them domestically without a foreign joint venture.

Which EV batteries does Ford use?

Ford currently utilizes batteries from CATL, LG, and SK On, among others, and has several joint venture plants coming online in 2025 and 2026 devoted to EV battery production. In any event, this isn't the first time Ford has announced an EV battery chemistry pivot.

What kind of battery does a Ford F150 use?

Ford currently uses two main battery types. There's an LFP battery for the entry-level Mustang Mach-E, and an NMC pack for the F-150 Lightning, E-Transit and rest of the Mach-E lineup. The LFP battery is sourced from Chinese battery giant CATL, while the latter reportedly comes from LG Energy Solution.

Will Ford use lithium manganese rich battery chemistry for electric vehicles?

Charles Poon, director of electrified propulsion engineering at Ford, revealed on LinkedIn that the automaker has been working on utilizing Lithium Manganese Rich (LMR) battery chemistry for its upcoming electric vehicles, and that the chemistry will be scaled and integrated into production vehicles before the decade is out.

## Ford uses cylindrical lithium batteries

### [Ford will use module-less LFP batteries from CATL](#)

Jul 21, 2022 · Finally! Ford will use module-less LFP (LiFePO4) batteries from CATL to cut costs by 10-15 percent starting next year. Moreover, the carmaker plans to localize and use 40 GWh ...

### [Ford-Owned American LFP Battery Plant Paves Way for Next ...](#)

3 days ago · The company's \$3 billion BlueOval Battery Park Michigan is set to revolutionize American manufacturing, bringing critical LFP battery production home and creating ...

### [Ford Reaffirms 2026 Launch for U.S. LFP Battery Plant to ...](#)

Jun 25, 2025 · Ford said it remains on track to begin production of lithium iron phosphate (LFP) batteries in the United States by 2026, reaffirming its plans despite mounting political ...

### [How Ford And GM Are Plotting A Battery Breakup With China](#)

Jun 5, 2025 · How Ford And GM Are Plotting A Battery Breakup With China Ford and General Motors are racing to develop a new type of electric vehicle battery. One engineer labeled it as ...

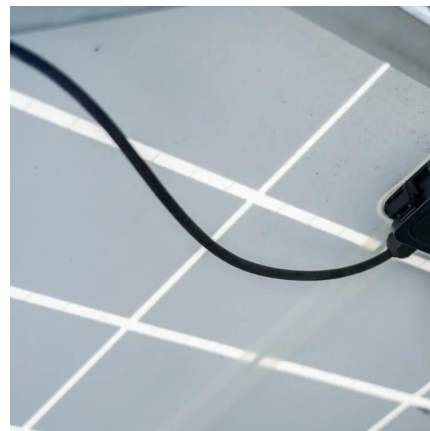

### Ford Aims to Beat Chinese OEMs with EVs Using Chinese Batteries ...

Jul 26, 2024 · Its Pro commercial business continues to dominate, with success in software services. Ford's \$3.5-billion EV battery factory in Michigan uses tech from CATL.

### [Can Ford Transform EVs with US-made LFP Battery Cells?](#)

Aug 17, 2025 · Ford has completed construction on BlueOval Battery Park Michigan in the US, a facility focused on lithium iron phosphate (LFP) battery cells. The company says this is the ...

### [Will Ford's US\\$3bn Sustainable Battery Park Transform EVs?](#)

Aug 15, 2025 · Ford advances clean energy with its US\$3bn BlueOval Battery Park in Michigan, producing LFP batteries to cut costs, boost EV adoption and create 1,700 jobs Ford is ...
