

German energy storage container production plant

Overview

Where are Gotion energy storage units made?

Gotion begins EU-certified mass production of 5 MWh energy storage units at its Göttingen facility in Germany, a former Bosch plant.

Is Germany a good place to invest in energy storage?

While the demand for energy storage is growing across Europe, Germany remains the European lead target market and the first choice for companies seeking to enter this fast-developing industry. The country stands out as a unique market, development platform and export hub.

How many solar power plants are there in Germany?

More than 1.7 million solar power plants, with a total capacity of more than 45 GWp, have been installed in Germany over the past 25 years. The majority are solar power plants with a capacity below 30 kWp installed on residential rooftops. They build the foundation for the promising market development of small energy storage systems.

How much does Germany spend on EV and stationary battery research?

Public research and development incentives for EV and stationary battery research amount to between EUR 80 million and EUR 85 million every year. As the European lead market in the energy transition age, Germany provides the opportunity for companies to develop, test, define and market new energy storage solutions.
