

# Greece mobile energy storage charging station electricity price

## Overview

---

Does Greece have a battery storage subsidy program?

Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2023, with the country now turning its focus towards a new 4.7 GW unsubsidized BESS scheme.

How is Greece transforming its energy system?

Greece is undergoing a major transformation in how it generates, delivers, and prices electricity. From a fossil-heavy past to a renewable-powered future, the country is embracing a cleaner and more competitive energy model—driven by policy, market innovation, and consumer choice.

What are Greek electricity bills?

Greek electricity bills include: Supply Charge – The actual cost of energy (can be fixed or variable). Network Charges – Regulated fees for using transmission and distribution lines. Public Service Obligations (PSOs) – Costs to support islands, renewable energy, and vulnerable consumers.

How much does a mw subsidy cost in Greece?

However, in December 2024, Greece downsized the third auction to 200 MW. The first two auctions concerned projects installed anywhere in Greece, while the third auction involved projects developed in former coal mining regions. The average subsidy price in the third auction exercise came at €52589.16/MW/year.
