

Hotel uses a 40-foot solar-powered container

Overview

Warnemünde, Germany The Dock Inn is a 40-foot-high zigzag of mostly solar-powered containers that cuts through a shipyard in Warnemünde, Germany. How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

What is a container hotel?

Container hotels, such as those by Contained, are off-the-grid, pop-up units designed for sustainable travel. They have appeared in Melbourne, Sydney, and Victoria and feature trendy neutrals, natural light, and metal and wood accents. Each unit is self-sufficient and solar-powered, and comes with a fold-out awning and deck for a glamping-esque experience.

What is a 20 & 40 ft shipping container?

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank. Fully customizable to your exact needs. The durable container design is completely waterproof, protects you and your equipment from the elements and any potential security threats.

Where are off-the-grid container hotels located?

Off-the-grid container hotels are popping up in different places around Sydney, Melbourne, and Victoria in Australia. Old is new again—that's the refrain reverberating through the metal walls of these hotels.
