

How big is a 20-foot liquid-cooled energy storage container

Overview

What is a populated 20ft NWI liquid-cooling energy storage container?

*Specification of Battery Rack The populated 20ft NWI liquid-cooling energy storage container is an integrated high energy density system, which consists of battery rack system (280Ah LFP cell), BMS (battery management system), FSS (fire suppression system), thermal management system and auxiliary distribution system.

How much energy does a liquid cooled container hold?

The latest generation product has an energy density of more than 440 Wh/l, a roundtrip efficiency of 96%, and a cycle lifetime of nearly 16,000 charge-discharge cycles. The liquid-cooled system has a voltage range from 1500 V – 2000 V and is configurable for storage durations of two to eight hours. The container weighs around 55 tons.

What is a 20 ft storage container?

The 20' new standard container is typically purchased to meet personal and business storage needs. A cargo container is an ideal storage solution for your inventory, seasonal items, tools, and additional possessions. Many 20 ft storage containers for sale in Saskatoon are modified and used to create incredible home offices and sheds.

How much does a 20ft storage container cost?

Prices for new and used 20FT storage containers at AutoTrader.ca range from \$4500 - \$11,500 plus HST and plus delivery.
