

# How many volts does the HJ base station power supply have

## Overview

---

① Multiple energy access: supports the introduction of multiple green power sources such as photovoltaic/wind power/oil engine. ② Multiple voltage outputs: AC220V, DC48V, -12V. ③ Intelligent system management: better energy saving and monitoring management; temperature-controlled fan automatically adjusts wind speed, low power consumption, supports RS485 serial communication upload. ④ Double-layer insulation structure: low comprehensive thermal conductivity (heat transfer coefficient  $0.024W/(m^2K)$ ) ⑤ IP55 protection level: 500 hours of salt spray time, can be used in a variety of harsh outdoor environments.
