

# How to use the base station solar container battery box

## Overview

---

What is a DIY solar battery box?

A DIY solar battery box is a rechargeable portable power station that supplies AC electricity (110V, 60Hz) and USB charging. This all-in-one solution combines three main components: Here is a simplified electrical diagram for a solar battery box: The solar charge controller ensures safe and efficient charging of the battery with a solar panel.

What should I connect between my solar panel and the battery box?

You cannot connect your solar panels directly to the battery box, as the current could be too strong and damage your battery. To prevent this, you need to ensure there is a solar regulator connected between the solar panel and the battery box.

How does a solar battery box work?

Here is a simplified electrical diagram for a solar battery box: The solar charge controller ensures safe and efficient charging of the battery with a solar panel. It ensures that the battery receives the correct voltage (12V, 24V, or 48V) and follows the proper charging profile. We recommend the MPPT models; they are the most efficient.

How much does a solar battery box cost?

A DIY solar battery box with a capacity of 640Wh and a power output of 500W costs less than \$570. This will give you enough energy to power lights, a phone, a laptop, a TV, and an electric fan during a short camping trip. For a larger capacity, be prepared to spend around \$1100.
