

Industrial base station communication equipment

Overview

What is a communication base station?

Communication base stations are an essential element in providing a stable communication environment for mobile communication devices such as mobile phones and smartphones. The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace.

What is a baseband unit (BBU)?

The baseband unit (BBU) is a crucial component in mobile base stations, handling tasks like signal processing, resource allocation, and protocol management to ensure efficient communication between mobile devices and networks. It also ensures security through encryption and manages interference and network operations.

What is a 5G base station & a compact base station?

The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace. Murata offers products that support high-speed, high-capacity communication, such as compact, low-loss capacitors and inductors, and high-frequency filters.

What is an industrial intercom system?

Our industrial intercom systems provide dependable high-performance communication solutions that function in extreme conditions to meet critical communication requirements.

Industrial base station communication equipment
