

# **Inspection of lead-acid batteries in solar container communication stations**

## Overview

---

What is a solar lead acid battery?

**Deep cycle capability:** Solar lead acid batteries are deep cycle batteries, which can be discharged and recharged multiple times without compromising performance. This feature makes them ideal for powering off-grid solar systems where regular cycling is required.

What is a sealed lead acid battery?

Sealed lead acid batteries, or SLA batteries, are maintenance-free batteries that do not require the user to check or refill electrolyte levels. They are sealed to prevent leakage and corrosion and are often used in small-scale solar power systems.

Are lead acid batteries good for solar energy storage?

During periods of low sunlight or at night, the stored energy in the lead acid batteries is used to power the electrical loads. **Cost-effective:** Lead-acid batteries are more affordable than rechargeable batteries, making them popular for solar energy storage.

What is a lead-acid battery maintenance plan?

This document provides recommended maintenance, test schedules, testing procedures, and analysis that can be used to optimize the life and performance of permanently installed, vented lead-acid batteries in stationary applications. It also provides guidance to determine when batteries should be replaced.
