

Irish solar panels 500 watts

Overview

How much do solar panels cost in Ireland?

In 2025, the cost of solar panels in Ireland varies depending on your system size, battery choice, and home type. Most homes will pay between €5,200 and €9,000 for a standard solar PV system. Adding a battery typically increases the total cost to €10,000–€14,500, but may also boost savings over time.

How much do bifacial solar panels cost in Ireland?

Bifacial solar panels are changing the game for Irish homeowners by generating power from both sides of the panel. They capture not only direct sunlight but also reflected light, making them a great fit for Ireland's often cloudy weather. A typical 4 kW bifacial system in Ireland costs between €8,000 and €12,000, including installation .

How much energy does a solar system use in Ireland?

Well, the average Irish household uses around 4,200 kWh of electricity per year. If you really want to get value out of your new solar system, you should aim to cover at least 75% of your energy consumption – meaning that average home would need 8–10 panels, most likely with a 4kW system or higher.

What can I expect from a solar energy grant in Ireland?

The table below gives a general idea of what to expect based on your home size: In 2025, Irish homeowners can claim up to €2,100 in SEAI solar panel grants, making solar more affordable than ever. These solar energy grants in Ireland are available nationwide and help cover the cost of rooftop systems, especially for homes built before 2021.
