

Jordanian solar-powered container three-phase railway station

Overview

What is the Jordanian railway network?

The Jordanian railway network project, which will be implemented by Etihad Rail in Jordan, is characterised by its strategic connection between phosphate and potash mines and the Port of Aqaba, a major port in the Red Sea region.

Will Jordan build a new railway project in Aqaba & Ghor es-Safi?

Jordan and the United Arab Emirates (UAE) inked four agreements, on Wednesday, to build a \$2.3 billion railway investment project that will link the port of Aqaba with the mining regions of Al-Shidiya and Ghor es-Safi.

What is Jordan's phosphate & potash railway project?

This ambitious project aims to connect Jordan's key phosphate and potash mining sites in Al-Shidiya and Ghor Al-Safi to the Port of Aqaba, enhancing the country's logistical capabilities and export efficiency. The railway project is part of a broader \$5.5 billion investment package agreed upon by Jordan and the UAE in November 2023.

How will Etihad Rail work in Jordan?

The agreement will see Etihad Rail facilitate the implementation of rail projects in Jordan, with the aim of building, developing, and operating a Jordanian railway network spanning 360 kilometres, linking phosphate and potash mines to the Port of Aqaba, reported WAM. The rail network is expected to be completed in five years.
