

Juba Shopping Mall solar Curtain Wall Manufacturer

Overview

What is a Juba curtain system?

It's a system that works for all of us. Scope included 62,000 square feet, comprised of both unitized and stick-built curtain walls. This project is a true representation of Juba's capabilities in both the preconstruction and installation phases.

How does a solar curtain wall work?

This system integrates photovoltaic components (such as solar panels) into the building curtain wall so that the curtain wall not only has traditional enclosure, decoration, and insulation functions but also can convert solar energy into electrical energy, providing green and clean energy for the building. Features 1.

What is a Juba project?

This project is a true representation of Juba's capabilities in both the preconstruction and installation phases. Starting in the concept phase, we worked extensively with the Architect and General Contractor providing the design aesthetic, performance, and installation quality demanded by a landmark project.

Why should you choose Juba?

Protecting your vision. Protecting your reputation. Protecting your relationships with the clients who matter most. Our industry is built on collaboration. Without trust and teamwork, a project simply won't get off the ground. Juba has succeeded along with our clients by helping you lay the groundwork for continued growth.
