

Large power station generator

Overview

What is a power station generator?

Based on diesel or gas engines, power station generators provide continuous power or grid stability power sharing when it is needed most. The systems are flexible in size and location, and readily available to meet urgent power needs. Outstanding fuel efficiency contributes to overall low lifecycle costs.

What is a portable power station?

A solar generator is a portable power station that supports solar panel input. They are often used interchangeably, but not all power stations come with solar panels. How long does a portable power station last during an outage?

Run time depends on capacity and load.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.

What is the difference between a power station and a solar generator?

A portable power station is a battery-powered device that stores energy and provides AC and DC output. A solar generator is essentially the same thing, but includes or supports solar panels for off-grid recharging. Note: Not all power stations are solar generators, but all solar generators are power stations with solar capability.
