

Latest Eastern European solar energy storage policies

Overview

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

How big is Europe's energy storage capacity?

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights Europe's rapid expansion in energy storage capacity, which reached 89 gigawatts (GW) by the end of 2024.

What is energy storage Europe Association?

Energy Storage Europe Association is actively shaping the legal and R&D funding framework for energy storage at EU level. Members gain direct influence in the European decision-making process. Members benefit from the Energy Storage Europe Association's expertise and technical know-how, and they can participate in EU-funded research projects.

Are solar and storage delivering European energy security and competitiveness?

The new reports underline the potential of solar and storage delivering European energy security and competitiveness. 'Embracing the benefits of Hybrid PV systems' - which includes solar hybrid projects with storage, wind, or both - estimates that hybrid projects have a 10% lower Levelised Cost of Electricity compared to standalone projects.
