

# London Outdoor Power BESS

## Overview

---

Does the UK need a more flexible energy system?

This, in turn, demands greater flexibility in the UK energy system – for example, in terms of battery storage. The UK is a global leader in the deployment of grid-scale BESS, and was among the first countries to actively pursue BESS investments.

How many Bess projects are there in the UK?

The research by UK independent power producer Root-Power identifies 173 BESS projects, with a combined capacity of 7.6GW, likely to benefit from changes designed to accelerate the UK's transition to clean power.

Is the UK Bess market a good investment for Europe?

In the second part in our series on backup power for Europe, we review the developments in the UK BESS market. The UK is one of the most attractive European countries for Battery Energy Storage System (BESS) investments.

Why does the UK need Bess?

The UK is a global leader in the deployment of grid-scale BESS, and was among the first countries to actively pursue BESS investments. The island has limited interconnection capacity and a heavy reliance on wind energy, which is why it needs BESS to ensure stability in its electricity system. The electricity system in the UK is rapidly evolving.
