

Low voltage energy storage inverter

Overview

What is a low cost 1000w power inverter?

This power inverter, with a low cost, produces modified sine wave 1000w continuous and 2000w peak power, converting 24V DC to 110V/220V AC power. It is a low cost option that can be used for car, home, RV, or anywhere that AC power is needed. The inverter features durable housing, a built-in cooling fan, and multi-protections for safe and effective use.

What is a low frequency power inverter?

A low frequency power inverter is a type of inverter that uses high speed power transistors to invert DC to AC at the same frequency (60 Hz or 50 Hz) as the AC sine wave output. These inverters are known for producing a low frequency hum.
