

Manufacturer Solar Remote Site Energy Prices

Overview

How much does solar energy cost in India?

With module imports subjected to basic custom duty, the tariff would be 2.95 INR/kWh and if a developer can procure domestic modules, the tariff would be INR 2.26 INR/kWh. Hence, the price trend for solar energy tipped towards the higher side of the scale during the said period. Procurement Resource provides latest prices of Solar Energy.

Why are solar panels so expensive in India?

With the soaring prices of raw materials, commodity inflation and custom duty the cost of solar power installation has gone up in India making it unviable for the manufacturers and consumers. In India, the prices of domestic solar panels have gone up by 50% averaging above 30 INR/watt.

How did our solar PV module manufacturing plant's financial model work?

Our solar PV module manufacturing plant's financial model was meticulously modelled to satisfy the client's requirements. It provided a thorough analysis of production costs including capital expenditures, manufacturing processes, raw materials, and operating costs.

Who is TP solar?

In January 2025, a INR 455 crore deal for the sale of 300 MWp solar modules has been acquired by TP Solar, a division of Tata Power Renewable Energy Ltd (TPREL). This contract supports India's renewable energy objectives by showcasing the nation's expanding solar energy industry.
