

# **Market Price of 600kW Solar Container Solar Unit in Cambodia**

## Overview

---

How much does solar energy cost in Cambodia?

One of the promising traits of solar energy in Cambodia is its cost. The average electricity price for solar power is around USD 0.03 per kW, significantly lower than that of coal, which is USD 7.7 per kW.

Are solar panels imported or re-exported in Cambodia?

During the same period, the country's solar panel imports rose rapidly and doubled to USD272 million but the volume was significantly lower than solar panel exports (Figure 1). This trade pattern suggests that a substantial portion of Cambodia's solar panel exports may have been assembled domestically rather than imported and re-exported.

How can Cambodia benefit from the solar panel industry?

In recent years, Cambodia has been able to benefit from the emerging solar panel industry by establishing factories, training workers, and developing trade partners. By continuing to improve both hard and soft infrastructure and to strategically explore more trade opportunities, Cambodia's solar panel exports have more room to grow.

What technologies are enhancing Cambodia's solar industry?

Emerging technologies are enhancing Cambodia's solar industry: Bifacial Solar Panels: Generate electricity from both sides, increasing efficiency. Perovskite Solar Cells: Offer higher energy conversion rates than traditional panels. Battery Storage Systems: Improve energy reliability by storing excess power for later use.

## Market Price of 600kW Solar Container Solar Unit in Cambodia
