

National standard eps battery cabinet

Overview

Which accumulator batteries are included in the cabinets covered by the technical specification?

The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries.

What is the enerpower painting standard?

The ENERPOWER painting standard is RAL 7016 (OTHERS ON REQUEST). Cabinets and drum elements shipped loose packed and to be assembled on site. Cabinets with the monoblocks assembled and connected to each other, but with the connections interrupted on each floor. Each monoblock is fixed to the shelves by means of plastic straps.

Where can I find the instruction manual for the batteries?

Inside the door there is a document pocket containing the instruction manual for the batteries. The sections can be fixed together to form a single cabinet. Where required, the cabinet is completed by a special compartment or switch/disconnector cubicle containing the protection equipment.

What temperature should a battery be operated at?

The operating temperature must be between +5°C and 40°C, even though the coil characteristics refer to 25°C. In particular, temperatures above 25°C have a negative effect on the life of the batteries, while temperatures below 25°C reduce the efficiency of the batteries.
