

Off-grid solar container hybrid payment method for island applications

Overview

Is there a subsidy on off-grid and hybrid solar systems?

As per new policies, there is no provision of subsidies on off-grid and hybrid solar systems. Please Note: The solar subsidy policies vary according to state. So please confirm the subsidy rates with your State Solar Department before installing the solar system.

Can a containerized Solar System be installed off-grid?

Off-Grid Installers have the answer with a containerized solar system from 3 kW up to 40 kW. Systems are fitted in new fully fitted containers either 20 or 40 feet depending on the size required.

What is an off-grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off-Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

What is an off-grid container & how does it work?

Access to a parts supply chain means that systems can be built quickly, efficiently and without compromise in the UK. The Off-Grid Container also transports the solar PV panels and mountings, the only part of the product which has to be assembled at the customer's site.
