

# Off-grid solar container project quotation 500kWh

## Overview

---

What is a 500-watt off-grid Solar System?

A 500-watt off-grid Solar System is designed to provide power supply for 4-5 hours to 2-3 BHK homes in India having an unreliable electricity supply. It is like a small power plant with a peak Load capacity of up to 650 Watts. It consists of monocrystalline panels and comes with more than 97% Inverter efficiency and over 16% Module efficiency.

What is included in a 500KVA solar power plant?

A complete 500kva 500kW solar power plant includes the following configurations: Optional solar mounts, PV combiner boxes, and PV cables. PVMARS provides a complete turnkey photovoltaic energy storage system solution. After we complete production, the system delivered to you can be used immediately after connections are made.

What is a 5kw solar storage system?

The 5kw solar storage system was installed in 2018. We were initially attracted to the idea of using lithium batteries at night while solar power supply our house during the day. In addition, it can also provide seamless grid failure protection.

How much does A 500KW solar power system cost?

500kW solar power system costs US\$461,256. (valid for 30 days). Note: The output voltage designed for the 500kW PCS on this page is three-phase 380v-415v If you request dual voltage 120v/240v, please leave a message about the required output voltage and email [solar@pvmars.com](mailto:solar@pvmars.com) to get a quote for customized output.
