

# **Off-grid solar-powered container for oil platforms 2MW**

## Overview

---

What is a self-storing solar power system?

This process allows us to provide solar power solutions with quick turnaround and short lead times from inception to installation. This collapsible, self-storing systems was a collaborative effort between our engineering design team and engineers from one of our oil services customers. Self-storing solar power systems ready for transport.

Which solar panels do you use?

We use the highest quality solar panels, including LG, Peimar, and Canadian Solar; these solar panels harvest the sun's power and stores the energy in high-quality lithium batteries, controlled with an external BMS. Then the power is distributed using Victron Multiplus units, so this inverter/charger can transfer the power.

Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.
